350 East Las Olas Boulevard
Suite 1000
Fort Lauderdale, FL 33301

Stephen Williamson is the Director of Information Technology for Berger Singerman. He is an experienced Systems Engineer with 12 years of law firm experience. Stephen's role provides the attorneys and staff with the technologies that will enable the firm to efficiently and securely deliver the highest value and quality of service to its clients.

His responsibilities include the implementation, management and support of the all firm's information, communications and security systems. He manages a highly skilled staff of Cisco and Microsoft certified engineers as well as the Firm's Litigation Support and E-Discovery Team.

Stephen is a member of International Legal Technology Association.

He received his B.A. in the Management of Information Systems from Florida International University.
